

Project Management & Development Consultants

ENVIRONMENT POLICY

PMDC management and employees are fully committed to provide value-added services in the areas of Project management and engineering consulting by ensuring a healthier and safer environment for all interested parties, the community and the surroundings in which it operates by minimizing Environmental impact.

In this context PMDC aims to achieve the following as prime objectives:

- Promote positive culture through active involvement of all employees and emphasize preventive approaches and techniques to sustainable development;
- Provide healthy environment and mitigate environmental impact during execution of development projects;
- Preserve the environment and prevent pollution by optimizing resource consumption and minimizing waste and emissions;
- Comply with applicable local laws, legislations, codes of practice and international environmental standards.

It is PMDC's commitment to establish, maintain and continually improve an effective Environmental Management System that complies with ISO 14001:2004, standard and other applicable requirements.

A handwritten signature in blue ink, appearing to read 'J. M. ...', is positioned above the printed name.
